Fastrack Announces Expansion Plans Due to Rapid Growth

Plainview, NY...Fastrack Healthcare Systems has launched a recruitment drive in an effort to add staff to accommodate their rapid growth.

According to Spencer Kay, President of Fastrack "The company has added a significant number of Home Medical Equipment Providers, Infusion Pharmacies and Home Healthcare Agencies to its' over 1,000 installed sites. Since January revenue has been up over 30% and we believe this trend will continue. We are seeing a large number of providers realizing the need to reduce their operating costs by improving productivity and that Fastrack technology is clearly the best answer. Our client base this year has seen the addition of quite a few major national and regional providers as well as hospitals including Seattle Children's and Sisters of Mercy Health System."

While a great deal of the growth can be attributed to Fastrack's Internet based Hosted Model, a number of clients continue to license the software to run on their own in-house servers. Fastrack has also seen increased revenue from existing clients adding their wireless warehouse and PDA based delivery system and the Fastrack Document Management System, key tools in improving productivity.

Fastrack is adding staff in Research & Development, Technical Support, Quality Assurance and in both inside and outside Sales. The company recently added a Implementation/Training Specialist and Development Programmers. The new staff will be

heavily involved in custom programming projects to meet specific client needs and incorporating new technologies into billing, inventory control and other key system areas.

Fastrack is the leading supplier of software & technology to Home Medical Equipment providers, Durable Medical Equipment, Respiratory Providers, Home Infusion Pharmacies & Home Healthcare Agencies. Only Fastrack offers a solution for each individual segment of Home Care as well as one system encompassing virtually every clinical, operational and financial aspect of a provider's business, automating several or all of these product/service lines within one integrated Microsoft SQL database.
